

Design your own T.rex

Draw a *T. rex* skull

Create your own drawing of a *T. rex* skull. Draw the flesh, skin and eyes onto the bones. Use information about how soft parts such as eyes and skin attach to bone in modern animals to help you. Draw in the gums, tongue and nostrils. What type of eyes do you think a *T. rex* had? What sort of skin did it have? As you draw on the skin think about where the muscles attached to the bones on the skull. What colour was your *T. rex*?

Choose eye shapes

Choose scale patterns (or make up your own)
